## SOFTWARE FROM BETASOFT

## GAMES MASTER FOR THE SAM COUPE:

At last YOU can create stunning games and demos for the Coupe, with fast, smooth, animated sprites, complex sound effects, missiles, platforms, 11 fts, detailed bockgrounds ec. No programming expertise required: Most of a game's design is speciffed by the menu-driven editor, which lets you edit graphics, animation, movement, sprite collision actions, sound effects, masking, control keys etc. A simple but very fast compiled language controis some features. A complex demo with animated bouncing sprites passing over and under each other, in front of a background, can be written with just a few commands to sturt the sprites off. (Once started, the sprites can act by themselves.) The editor produces stand-alone ROM-independent CODE programs that are free from any copyright restrictions - so you can sell your masterpiece! Impresgive demonstration programs and an extensive sprite lilbrary are included to get you started. Backgrounds and sprites can also be grabbed from any Mode 4 screen and ediled.

## SIX SPRITE PLANES PLUS BACKGROUND

BIG SPRITES - UP TO A THIRD OF THE SCREEN AREA
TRUE COLLISION DETECTION ON SPRITE EDGE
SMOOTH, FAST PTXEL MOVEMENT OVER 100 ON-SCREEN SPRITES POWERFUL EASY TO USE EDTTOR COMPILED CONTROL LANGUAGE COMPLEX MOVEMENT PATTERNS AND ANTMATION SEQUENCES

Written by
Written by Dr Andy Wright, author of the Sam ROM, MASTERDOS and
MASTERBASIC, the program works with 256 K or 512 K RAM and ROM 2.0 and above. A comprehenslve manual is included.
 grmes master costs just equ.90 inclusive of postage and packing (add ey if outside

NEW it secreis of the BAM ROW reveated The complate ROM 3 eowroe tiating on diak, extenalvely commented by the programmer, Andy Wright. Addresses and memory contents are Included to make comparieon with the actual hom enily. The viewing program lets you move lightning-tant through the

## EVEN LIESS GAMES ON TY

Last months newn itel ticled EVEN MORE GMES ON TV seans to have put urse on the Bac2 show 100t．Even before the printerit ink mas dry rumors
were floatsing that the ehow was in trouble and it now looks certain that the show，complete with itil promilled computer gases bection has been axed
BBC2 has ttruggled for Bevaral year to provide alternative（youth）vieving to po alongeids interrational and local nema coverage on BBCl，Howevar only old（but still good）puppet series（like Thunderbirds and Stingray）and the wuch ucked about Star Trek THG tana to oraw in the vievers．
The progran planner now have plana lor youth ahow to be screened later in the evening（ 80 it can tackle harder－hitting subjects）and it is most unlikely that this would include anything to do with games．

## BUGAR BNY－BACK YICHT

Alan Sugar＇：plan to purchase the shares of Anstrad he sold in the 80 ＇e and take Anstrad off the Stock Market have come up againet a iutch．
A group of shareholdert who teel that the 30 p per thare offer is not onough have pledgas to fight the move in the run－up to the companies next ICM．

It 1s also uncertain if Sugar can gain enough votes from the large institutional bhareholder to get mis plan through it he fo unable to vot his own whare block on this matter．
While Amstrad looks round for a new protuct line to make money on there push into many markets fs now centred round their＂User Friendly＂ranges from computer to videce．
if Aath 8ugar is aucceasful it could atart a run of such＂repurchasen moves 1th everal high－etrott namen looking closely at taking their shares off the Stock Market which they，1ike Anstrad eel does not underetand the modern retail antustry retail industry
This story books ent to run and run．

I boobed last month．Ny bit from Ettrich Thomen molving the card problem had nothing to to with Steve＇s day／date solution．My apologies， day／date solution．ny apologies， from this，again from alan is on irom this，again from Alan，is a included provioully，put which bleo got transposed with iomething else（Ey got logies，Alan）alam entions that the problen with the court card in brider hand wre easily dealt win a Bas1e－thare is no netd to mo into bascine thers is no noed to so into ports．or suything complicuted or alaborate．staying with gasic．you erely cail tha cards of each to 13 （or 2 to 14 if par prefer）Yon only need the 3， 0 ， 8 and a notatione when you comunicate with hunans，and this is easily done by fncluding yarious tatamente in PRINT command like（＂x＋AND ta 13 ），ote You tan alo easily include anit yaive if you vant to：in partlcular you fan enhance the value of the current trump suit by for avample cardval＝cardual 100e（5uitetrupa）

Many thanke，is usual，Alen．
Ettrich Thomson in fact also sent in the following information，which does concern the day／date probles．He mentions that in bis progran ＂Heekdey＂thare is by spectru＊ symtay error in GNE 40，Hers there is no gancol hatween the promet is no cenicolon between the prompt＂ year（eg 1932．，and the variable，Yr． cemicolon，although occeptable，in emsention，although acceptable，1t mot Thit is another small moint for manust，which 18 etill on my list of
＂thinge to do＂Many thanks，Ettzick．
A surther boob，too，while I＇m at It，which you thould be able to use for yout advantaģ，as they say． Ettrick＇s original progran for shi， ＂Weekday＂，contains a procedure which shouldn＇t be ther＊，You had if bs a bonul．It wab inadvertently inciuded when Ettrick saved the progran，and didn＇t ede it，lither．So what is this mytarious say procedure，and what
 halp with blisting programs． particularly to an Epson－compatible printer．Parameters：it LLISTS From dines L 1 to L with fatt hand margin $\mathrm{m}_{\text {t }}$ and v charactera per line．If your program has hash eigna，onit a from the call，but 12 it hal pound sicna put pa3．There ire quite a fem other Epson printer control codes．Thay bet elite pitch，slash seros，choose international character set $n_{r}$ and left－hand pargin i⿻口卄 rotore mornal printer settingil when it＇s all done．
in cape you didn＇t gat it before， here it is．．．

20000 DEF PROC Letprg L1，L2，B，w，n 20010 DEFAULT $m=0,0 \times 10, \mathrm{n}=0$
20020 LOCAL ES：PONE SVAR 14， 0 － 1
20030 LET ©5लCHRS 27：OPEN ©5，＂b＂
 ＂；CHRS n：es；＂1＂；CHRS m
20050 LLIST L2 2 1 50 L2
 E 15
20070 POKE SVAR 14． 79
20080 END PROC
Finally frow Ettrick，that program rom A．Watson，printed in October＇s ＂Short Spot＂，You remamber，＂Defkey＂， which＂LPRINTs to the screen＂！Here＇s how it worke．

LPRINY（and LLigt and COPY．for that matter）first 1511 up the printer buffer，a line at a time；each byte （they are not dealt with consecutively）is loaded Into an Systen myariable＂ 23681 and for byte rom PR CC at 23680； 2368 normally
contain 91，and $91 * 256=23296$ ，the first byte of the display file．So what happons is that each LPRINT statenent puts data not into the printer buffer，bat into the dieplay file，to you soe it on the screen，in a poistion deterninad by（23681）．But the curious layout of the dienley file （Hanual Chapter 24）The Homory）means that each line of print does not occupy 8 consecutive pixel rowe，as is usually sranged，but the 8 pixel sows appear separately， 8 pixel rows apart． So the progran＂prints＊each string 8 1ibeer one pixel row bereath the previous printing，and hence each string appears on the screen with all its characters atretched out 8 tinas in the vertical direction．

Many thanks，Eterick．
a note of distresa froa Kevin Gould of Heighington，Lincolnshirt，mext． You remember，he $d$ a probler when he tried to use the pokes to use the Spactrum +2 n ＇s printer port with s PLUS D，still bo go．I suapect by anaver＇s correct，then，and the problem lise mith $\mathrm{G}+\mathrm{DOS}$ grabbing the hatput．I suspect also that it＇e now to be cut Homewhere．Brian Gaff tyou could wall contact him）night have the solution，but manwhile，can anyone help ulat ploane drop me a 1 ne if you know how to deal with this problen

Next．we have a big fat package，by registered raall，from Istvan Ordog of Budapest，Hangary，Great to hear from you dgain，litvan．Igtvan atnt me a disc tool kit for the PLUS D，asking me my opinion．It comes up with an expanding oblong on the screen in nice coloure，with options like Catalogue， disc monitor，track test，track toolkit，afrectory oditor，hidden ［1le，racall，IBN convert，help and orit．The cursor key eresis enscs inverse bar up and down，allowing you to belect．The overall standard of programaing is very bigh．Istvan asks if it could be sold in＂FORMAT＂ readere＇gervicese．Normally，we woul expect you to asfuertise in the usua way，but in view of the problemi，of corresponding，we＇ll mee what can be
done

Next，here＇s a ilttle calendar fron Intvar $2 x$ Ueer club．It promptr you for the won and year，and the print up coaplet caiendar of that befor I hate wa ve had calender befor－this rery alce and quick． vorgir and quite weanonabli christmas has nom calender for Christas，dom they．Istvan mentions that on fors or their spectrum（thome lil a dock board added．an autorun le cullt－1 clock on booting．

60 PALETTE C.s: NEXT s. NEXT a: COT C 50

Jut a little point of puzzlement though. Why doas the rotabing tws 51 go 011 faint on mef hour can one prevent it? come on, all you clever, advanced programara: drop me a line.

Now "Tube". I've seen lotn of tube prograse for SAM: so have you. This one, momever, makei an unusually eolld tube that gets bigger and bigger an it divances in an undulating fashion towards you, on-screen.

10 MODE 4: PALETTE : PAPER 0: BORDE R O; CLS
20 LET $P=1:$ FOR $\pi=1$ TO 207 STEP 3:
 SIN $(z / 7)+8 B), x / 5+g$
40 NEXT g : NEXT z
Unfortunately, this progras does not give you the opportunity to alter the choles of coloura: they're ifized, though there's lots.

There is, however, s ince little addition to "tube". Just add the following linee...

10 MODE 4: PALETTE : PAPER 0: BORDE R 0: CLS
50 FOR $a=1$ TO 15: FOR $\begin{gathered}\text { 104 } \\ \text { TO } \\ 0\end{gathered}$ STEP -1: LET c=a4s: IF c> 15 THEN LET $c=c-15$
60 PALETTE c.s: NEXT s: NEXT a: GOT 050
and the tube weithen it forrific interinal motion. \{Yuk!).

Again, the same problens ensue. The colourl of the writhing tube are very faint. After all. I guess the same princlple's invoked, Maybe 18 there wall sone calculation on the variables ${ }^{*} \mathrm{c}$ " and "s", so that bright colours were shown on-acreen, the effect would be better, Needs someone with more knowledge of the palette than en though... kow about it?
"Kow, you cruffy mo-and-mo's. Marks all ovar the polished etuff, aren't
there, off with your fingerd Co away and play with your computer, and intop micking aboat ". Bo, nevar heard comenta like that? Never mind; here's progran to make nice cloan finger rint on-merant Don't worry if sal
 time to think in this one!

5 MODE 1
10 BORDER 0: PAPER 0; PEN 7: CLS
30 LET an 76.11
40 LET alfoaaPI/180: LET $\mathrm{c}=\cos$ (alt
50 - Est E-SIH (alf)
60 LET nanis $=200$
70 LET $\mathrm{C=52}$
90 FOR $3=170 \mathrm{n}$
90 LET $\mathrm{z}=0$ : LET $y=1 /=$

Matcon Jones has a program，whtch he 1s trying to convert to his sAM running MasterDOS．in which variable
called NC 19 DIMensioned e．s DIM NC（76）．Part of the way through the program 11 the line ERASE MC：DIM NC（76），In anothar sialiar program， the DIH II ter the ERASE io for different nunter（different vize array）．

In SAN BASIC how can ha ERASE the original array and set up a mev array using the same mawe but offferent sise，The progran in top involved to use two ditierent array anas．thoy both une the asto 1 nfo but be prosuses for different reasons．

Ray answers：With both Spectrum and ShH EASIC it if cuite almple to grage the contente of an array．All you need to so if to declare anothar array uning the sasp variable nase with the DIM comand，and using the samo or revised dimeteions．
what you can＇t do－is to awend the dimoneione of ap array witbout arasing sll the existing deta．Mastarbasic gives the facility to so thin in respact of etrings and etriag arrays； just one of the many uaetul functions provided by this excalient piece of software by Dr．Andrew Wright．

Another one from Malcom．He has recently been given a VDU with no eanual．The eake is INCOTERM CORPORATIOK A66－03．On the rear of the sonitor are 3 ＂D＂mockats and one Jl is 7 pin whil 32 ci J3 are 15 pin． fo would like to connact aither bis SAM or 徝 Spectrua to 1t．

Kovin：I have＋2a which has the RCB socket，however a custon made board which a friend made had to be te fitted inside the VDU，this het no sound．

A guick［1ick to Aprid 91 （perhape W．Marsden from 8 t．Helans could writ in）hes a Spectrum＊and \＆Sanyo BH－12ESN VDif．Mev answers the number of lines required if 625，You would reed in RGB ingut on the VDU as well at the spaccy（128k models have e proper RGE output figna！and rocket）．

Ray adds：Re coes not know this sake either but continues regarding monitors to Spectrun and SMM，I would Iot row readers to rrite in and in connecting various eonitors and had in connecting varioun monitors and TV sete（using the aarial socket or the SCART，sit ithe I can comple a list then be published in FORMAT．The kind of information an after，The kind equaplent type and cost，is the clarity erability and control the display，the reproductson of colours and by，the reproduction of coloure， encosmtered any or not you hava information is long overdue and in gure it mill to of ues to many I sure it wll be of use to many reader who are contemplating current dsepliy equipnent．

Cose on，those of you who are using a vou write in，you have done it so tell us．

Tony Watron vrites＂he no đoubt many readers will huve inform you．dawn 3111 only come in＂Lords of Midnight＂ preseconds or to aster you heve pressed the＂NIGHT＂key（U）．During their response to your moves．

Rowever，the above applites to the tape loaded Spectrua verilon，The gape does not seef to travel well yia the Messenger to the SAM ©itc and when fight falls on the disc atored version，it stays fallen．

Another gase which also falde to translata to the SAM dilic via Hesoenger ig＂As ruolf＂mitch losel atl vertical control．

I too would like rome help with solutions to these iranafar probleas whether thoy are games，ut11tifes or whatever．

Ray answerf：I＇m gorry I can＇t halp you on this one av 1 not bave tranofer problens are promras prying to ate csused by the proyra trying to ula a spectrun por uithin suy，pr the other purposes within sam．On the face of it this
that tibe，es the progran worke when tape loaded．At you say，there are many problent which arise whon trying to run spectral software on SAM，It would be useful if raaders could let us know what problems thay have encounteref and inform us of any Bolution they have sound，期 that we can pasi thell on；in particular does anyone have eolution to Tony＇栾 problem？

Kevia adds：Doal any ond know if it is ponetible to trangfer WEC Le－Hans （Spectruas to PLUS D diec．．The asic is protected．．eny idmas．． You can＇t get a question much
ghorter than this froa Mark Longhorn， thaske Mark．

What it the pin contiguration on the PLUS D disc drive．

Ray anawars，looking at the back of the PiUS D and reading right to left the top line are numbered 1 to 33 and the bottol ilne are numbered 2 to 34 ． Hare is what they do．The othar plot are not connected．

## A P DISC <br>  <br> For Spectrum Or Sam

By:- Carol Brookebank.

Have you ever thought of sending your computing friends a Christimas disc, instead of a Christmas card? I have done this a couple of timen, once even back in my 48 k spectrum dayn.

What you put on the diec munt be your oun choich, of course, because a personalized Christmas "card" must be junt that - personal. So all I can do is tell you the form my Aiscs took, in the hope that it wisl triggar off idese In you.

My discs had a "Boundtrack" of Christass carole, and a number of suitably Christmassy Bcreens which were displayed one after the other.

I think you maed a loading ecrean first, which eay something about this being chrietman greeting, teliing the recipient to turn up the monitor voluee so that he can hear the music. If you have any, and perhapg to press a key, when all the screen code blocks and masic are loaded. to etart the dieplay.

1 use about threa or four other screens - usually fasturing a Nativity scene or the Wise Men on one. Santa on another, tomething like a mowman, robina or a Chriatmag sree on another, and one which carrian the greeting ay eessagis and name. Latityear's card had elinal screen which sasd "The end", when the music finished.
Since I cannot produce original
 main tourcos = clip art and the charts in eabroidery books. Clip art is now freely avallable for both SAM and the Spectrum, and almost all collections have usefni Christmas material. I have the collections from TEACHERS PET, SAM SUPPLEMENT, DAVE LEDBURY, SAMPRLNT (Noessie' pard and poster printing progran) and PCG.

Fig. 1.
Thanks to all these different collections, I can choone from 1 ? Santas, 12 Christaas trees, 2 Bethlehems, 3 Christmas puddings, and asworted holly, gifte, trackern, decorations, targ, angele, carol singern, anownat and raindear. Moat of the are spactrue scratis in black-and-white. You can use them on SAM, of course. Load them into PLASH in MODE 1. If you wigb, you can then select MODE 4 before adding colour. When ddding colour on the spectrus, or SAM mode i. you mait be careful about sttribute clasher. Very pracime placing of your motifs is needed to sllow you to sake the best usie of colour, given that only two colours per Bat pirel cell are available. SAM specific material suppliad in mode a screent is oftan already coloured. Figs. 1 and 2 show jutt athy sample of Chriotmae motifs from these elip art collections.

If you are going to combine motifs to make your screens, you mill need an art package. ART STUDIO. THE ARTIBT 4I, and SAM © FLASH all iet you Insert bite and pieces from other sereens

Ein， 2.
tnto the one you are working on，and bll allow you to eroll materias around，or cut－and－paste it，to axact positional I eaintein couple of HRT GTUD10 contarnime An fis sotifi th that they are readly svaliable．Som of 㙏 SN screans STUD sTubipulation becalse anipuling wotrs and rescaling then themer than wis finansfer then to FRa and Hod for the final colouring．

11 you plan to une geveral screens es well as music，unpacisily on the Spectrun，you say run out of menory． THE ARTIST If has a nost usefel screen compressor which allows you to save a number of sereant in a very economacal code file．and cal！then Irco Basic as you heed then．A manlar conpressor for SAM MoDE a gcreeng is avallable on
STEVE S SOFTWARE＇s SC＿PD3．

My source for more elaborate screens is abrozdery books，especially trositetitch and tapestry booki，which have charts on tquared paper．flastiang
patteram can elto de uentul，Dot you need the nort of knatking chats which have rectangular grids rather than squared，because knitting charts on squarad gride have etrange proportions． 18 possible，I Dse pixels par gerid guare for rectanglel， wo that can fitt plenty of dotall and amooth curves．If this would make the pleturt too big for the ecrees，I use one pixel par equare．Fig． 3 shows a SAM mode 4 screer from a cross－stitch pattarn．The lattering is Ey own additton．

1513．3
I use FORUAT＇FONT LIBRARY or the OTP PACK Headilner！fonts for ay lettering．Fig． 4 shows a greeting acreen uning Hadilinert fonts．The greeting is written in a font sent to me Ly Luca Alimandi，FOMMT contributor with formable talent for font design．Some of ut are trying to persuade Luca to market hls Headliner！fonts．Our thase are wijtten ir a Headliner！font I made mynelf fusing Lucs＇s font editorl． copied from one of the large tonts in the Spactrum ICOW GRAPKIX 128 progitan．

How to turn to mulle，Frankly，it you math to do tha wort of thing with a．48k Spectrum，you need a 基sic package like velBOURNE＇THE NUSIC BOR．BEEP OD 1ts onm is too feeble to produce anything worth listening to． SAM ssect whll tind mustc witane much －anier If thay have REVELATION＇THE SOUND MACHINE，If you have a music packaye，follow the instructions and progran in thrae or four of your favonrite carols．I an going to concentrate now on muse prograbing in BASIC on sAl and the l20k spectrue．
Prankly， 181 have to produce musbc using BASIC， 1 would far rather use a 128K Spectrue than a SAM．The Spectrus
 Will produce excelient maic with 3－note chorde，even aljowing notes of difierent lengthy in the game chord． Variable length raste tre adey to progra…

Listing 1 is＂0 coms all Fe faithyul for the 12日内 Spectrum， played through twice with a dascant on the etecond weres．girin in is the
 the tenor line．Thase thre etringe are played together for the first verse．On the repeat，the sopranc line remasne the same，the second notes of the chord ari the sopreno line rapeated an octave dowar．The third line to a dateant，dt．The ehort stringe as and hs get the tenpo and octaves，and are prefined to the tune strings along with＂V＂and either －1：15）or $\quad 2(121$ ，which sets the appropriate voluse levele ed thet the melody ling and descant are mightly louder then the harmony 11 nes．

If you type this liating．be careful about the use of capital and lower case letters in the etringt．ileo． capital＂ 0 ＂has a gpecial Bignificance to the PLAY command－it tots the octave－ 50 be careful not to confuse it with Ofzero）．There ast ito spacas in the lorg letrings－one lina runs strasght into the next．The etrings must be exactly as thay appear in the listing 19 the mubic 10 to bound right．You can add nore trings for other carole in the gane way．

How to pat it ala together？Your disc wlll meed a DOS flle on 1 t ．SNM users rust onfy use a Masterbasic dos if you are sending discs to Iriands who slresdy own Mapterbasic，or you will bereaking the copyright laws．

## If in Coubt，bse SAMDOS．］

Than you bead an muto roundry pogran which wilf load firgt oadsng ecrean，and that your acreen file，（14 you hive ulad a comprangor） your masic（is you have uged a mulic patkage Dr 1 Mastorbasic string）， and／or the maln progran wich plays your masic and displays your screens．

If You are ining HasterBasic，you can let the gusic runnimg with BLiTz tunes，and then didpay the sereans one arter the other，desing pause to time the changes．If you use a＊THE END＂Ecreen，tim it to cosmeide with the end of the last carol．

With the spactrum or Basdos，you 111 have to call the mule in blockin， aither of one carol or cand vares，and change terceans betwetn masic block？ If you are not using compressed ecreens，you may need to load etch screen frow diec at it is needed， especially with the Spectrus or－ 256 K SRM

You bay need a lot of run－throughe， With changes to phuse vaives of the points at which you change screens． before you are tatisfied．When yous master disc pleases yon，make your coptes．

A nien final touch is to make a Christnessy label for the disce．（Tig． 6）Ordinati tractor－feed adress labels are fine，thorgh you may have to tott a b1t off the width．It you have coloar printer．or coe colourad ribboas for your monochront printer，printing the labal in say， red and grean，can be very effective

Eig． 5.

So there you are，rour Chribtan greatsig probleni iolved．Have fur making your disct，and very happy Christmas to you all

SUPER-GOLF

By:- Bob Breachley.

The Paraonel banking bystam assists you in koeping track of your flaances, spanning all Bank, Bullding Society and credit Card accounts; avoiding expensive overdraft letters and bounced cheque charges, because you will alwaye know whoro you Etand.
Here mre jutt mome of tha Zacilithes available: $=$

- atitonetie pointing of mtanding orders atirect debita for any trequency and for a set number of payments
- extenaive, Elexible anquirian eg how much have you padd to the bupernarket each month or how moh to run your car
- forward projectiona to mable you to plan how much monoy you have left to live on
- detailou sank Etatamente, more up-bo-date than the ones fros your Bank, etce = password controlled
- on-tcreon 1imit monitoring mo you know inenediately 12 you tra going Into the rad
- Bank reconciliatlon wo you can check the etentemant repelved frob your Bank and soe where they have gone wrong
- mittable for privite, club or small bugire Hilton'e accounte) - optional ver facility
- optional catogorita for anelyale, fopount and gereral lodger codes with on-acreen lookup fateure
- on-screan holp, supplamentod by triandly 75 page user manusl o optional modules fvailable eg zinal hocounts and audgat:
- trade in allowance mvilable ahould you lator buy a different make of conputer - upgrade bencifite

The Pbs requirea sambos or MasterDDS, 256 K or 512 K RAM and 1 or 2 disk drives. Full arter shle support provided.
Similar versioni are available for other computers eg esc, oL pc and plarnad for Nigiga and Atari, Br.
PDE $: ~ d e$ gtill avallable for the spactrum (all modele) on massette, Dlerodrive. PlumD/Disciple and opus for juat E12.

Stop Fross ... pids mudget module if now tvailable "E12.03. Do you have the latest copy of then sand orfainal disk, Iq not stanp, for free, updated papy

Send just 219.05 for pas disk and 75 page uner manual to:-
Hilton Computer sorviaes Ltd 3 Euffoik Drivi, Guildford, surt等, GU4 7YD (0483 578983)

As a special cmistnas treat for al you readers who like programs to type in I thought I would preetent one of my owt (vory 'unble) offeringe.

Way back in 1982 I wrote a atmpla gane of colf for the $2 x 81$. It sold a few copies bat I did not get rich Then in 1982, with the launch of the Spectrum, I added colour and UDG graphtet The Spectrus version sold over 9,000 copies through W.B.Smith's alone a not had aven in those meady days.

It is a progral for all ages, both sexes, and can even be played by teams (I once had two very drunh teans, anch of about 12 people, take an average of 20 shote to hole bach balll. the program has alen wold woll to educational establishments because it helps to teach children the concept of acale - the distance on bcrean between the tee and the hole has to be jooked at in relation to the lengith of the hole in yarde.

Since 1982 the prograil that been modified a fen times but overall this is still vintage progrataing. The progran rolias on the fact that aach feature on the course can be detected by ite colsur - using combinations of INK, PAPER And BRIGKT to make the difference.

So how about a little project for you progranming wizards ont there in FORMAT I and.

First type in the progran, it stould require only a line:-

## 10 MODE 1: CSIZE 9.8

to mork on a SAM. If you are really too Jaxy to type it in then mand ul t2.95 and we will send yot a copy on disc (3h or 3 h 80 track only).

Now, wonderful gane that it 15, there is room for many i-provements eppecislly it at shr verimion. Bo get programing and send in your enhancements $t 12$ they are mote than a Ram 11nta long thar tend tham on alne pleasej. Once or twice over the next fev months will run a special feature and print the bett of your ideas, asch printed contribution will ears the sender extre Format subtcription (how long depend on what you mern - the Editor' ${ }^{\text {b }}$ decision inal of courge). So, how about s little man swinging elub? Mort detail on screen? Club selection? The list is long

In addition Revelation Soltware have agreed to publisin the best cols game you cen can ug with for sar (just think of dal those royalties). You don't need to start with this one, you could do your own thing alther in Basic or Machine code, but it must ba good. GraphicE, colour and sound would a.l hived to be flyst clase.

## CHRISTMASFUN

"You fuer meit ritit you've landed on as many

Note found on the Editor's desk Things are looking up. Im only two weeks behind schedual....

'But you said - 'evening dress"

"And Finally, No. 11
"Thou shall gel forget Ithy INDUG membership number

Found at iath che Last Pharach's tast in Areven knows how he ceme to be buried in
the middie of Sewathorget..."

"Vory miec Mable but I thiak 'Howl the

The littio Polar bear goes up to his molher and saye "Am I a brown bear?" to which his mummy tays "No son, you'ro a Polar bear," The baby bear sits and thinks for an whila and then spys "tummy, mi a Koala Bear"" Once again ms mummy assurea him that he is definitely a Polar bear. The baby bear ambles off into the snow but son relums and approaches tis mother. "Wummy, am I A teddy bearr" Now the mummy bear is getting a litle pieed of and says Look son. Why all the questions? You are a POLAR BEAR wall mummy, why an I so bloody cold than ?

Dear Editor,
Having recently subscribed to your FORMAT magasinal I would like to congratulate you on your varied and nusual magazine.
I an trying to learn achinne code on ay $\rightarrow 3$ spectrus and here varied boaks on the subjects, such as 280 Progranming by Rodney Zaks and eleveral folbourne Houge books such 部 "The Completa Spectrum Ron Disaspeably". in malaly intereated ith controlifng $D C$ Sorvo motors for radio control through the Spectrue. Obviously, for real time novement alachine code is the only way orward.
My $A$ to $D$ converter if an INTERSPEC from DCP MIcrodevelopments Lte., 2 Station close, Lingwood. Norwich.
And to to my IIrtt quastion, I did use an excallent book some yaars ago but I do not know the 15 SiN No. The book was $A 5$ size (halt M4), with a very dietinctive bilver foll cover, and titie something 11 km Interfacing frojects for the $2 x$ Sptctrus *. Aso could you suggest any other books on the aubject or if thare an address of publigher who spacialisel in this area of biterature. I have been rather diappointed by the lack of response irom addrenses which are suggestet in booke or, Bagazines, one or two have oven been returned by the Royal Hall,
Second question, i would be very grateful for any Spectrul specialists in the Morthamptionshir Area, preferably with knowledge of machine code or fdeally motor control,
Hopefully, you will be eble to help because I comentted to ubing my +3 Spectrus due to the cost of the project so far, However. I feel aure the information is available its just a matter of finding it. Many Thanke,

Yours aincerely, Christopher Bor.
I'm not too suxpriend at your poor
luck with writing to companies - it is gad to say that most Spectrua companies tre long fone, is any readere can halp Chrin I will pase letters on is ugual. In the meantime ry the library, ALL bookt er avanlabin on loan 14 you order them through the system. Bd.

Dear Editor.
1 have just received my Septanber setw of forwat and I on enyoying the ay oin story pagen, 1 sust ayy that The Young Years" is excellent. Can't you twist May'E are to gat bin back to Mriting tha He?p Pages, you can't le hin go, be if part of an axcellant oam.
Will you pleald answer na fow quarier on the ghM for me.

1. Doet the SAM com with a monitor? 2. Is an emulator necessary?

2a. Emulators, ads say they work on
 abort 128k programs?
3. Did I read recently of a built in digitsear?
4. Do goo know of any titling program for shy or Spectrul for cancorders.

Your" Bincerely, Herry Connell.
Quick anowera:- 1 = no. 2 - 1 presume you mean Spectrua molatore in which case yes and no, you could just load a copy of the spectrun nox as detalled in Vol 3 Ni 5, but comercial emlators bave many artras boilt in. To amulate 12dK apectrin you would nead hardiart = abict to usk o 128 x Spectrum. 3 - Don't understand question. Datine digitisar. 4 There 10 one for the Spectrum that is advertised in some of the video mags but using batic and some mixed sereen fonts (on elther machipa) is juat a good.
and wiva loy gets time ha has promised to urite articla for FORHAT
he just can＇t connit to writing a regulax monthly columin．Ed．

## Dear Editor．

he per our telephone conversation codsy plaate tin you re－copy＂Dragon Tilet onto encloned ditec which managed to corrupt whilst blowing up SAM＇ $\operatorname{ASIC}$ ．

I would thank you for producing the gamer but it may result in maving to buy en oxtre SAM．The reblation dil my wise（who hates computere！）1i totally addictad to it，and won＇t itt in have SAM back！

May I almo thank yoo for the production of FORMAT which fust gets better and botter．Thanks again，

Yourn sinceraly，Gary Cooper．
Tell har she hul good taste． Ed ．
Dear Editor，
Firstly，thank you for picking up the pieces of Binclair fo SAM Computing，I thought I had seen the I先t of my subecription so it cane as a vary pleasant burprice to hear from your organization．
In return，perhaps 1 can help Peter Eallie（letters，October）：on an issue 3 rubber Spectru（and probably ifsule 4，though i don＇t know for gurel the resily connection of the edge eon uctor roblly doas produc a componit ve video signal，Which works quite well With
the direct video input of my television，so I assune it vould drive a monitor．Adrian Dickens＇book is very cood，but it only covers iesues d and 2 ．

Youre sincerely，Andrem Toller．
We have etill not plcked up all the pleces yet．Mr Garner was very çulck to sign a contract when all about him was collapeing，but now it conel to handing over the goods he fie io blow he 14 almost going into reverse．
So far fot has only given us about 200 live names and addresses and a lot of those still need to be sorted out bacause his＇outstanding issues＇ figury doef apt agref with the eubicribers．
In addition he itlli，four months
later，hat not supplied us with master artwork etc for the issues he did， 80 me can make them avaliable to a wider audience．
Still wo will plod on．Ong dey avarything will be torted out．Bd．

## Dear Editor，

I was appealed to subscribe to the magazine Sinclair Sall Computing by information（read sonewhere eloe and conflrmed by phons by Hr Garner）that it coverge eht flald of both spectruen （f SAME）and OL：（see PS），Whone contimued＂life＂（ses PS），whone contimued lire I would like to astablished interests of sone dark economical forces．
In the 3 issues received，nothing about ole wis publiehed，excenmive attention to Amstrad＇e compusers． these could hardly compare in fold numbers to Spectrum（genvise ones！） and ols．Those，if any，could be considered dincsaurians and extinct， with theirs deficipnt tapa recordari and badly chosen $3^{\text {I }}$ diece．
Amonget the positive faatures of SGSC was，in my opinton，theit NO comitreent obly to gamele，which I find exceedingly tiresome in other magazines I mo more subscribe to，and their Technical Helpline／Enquicies Service which i never used but nevartheless intended to use to but nevarthoinss intended to ule te fat for the OPUS Disc drive to 720 k ．
PS．I have converted $\quad y$ ols into VERY powerful fast，flexible and reliable machines，and note that $t$ to not oum machines，and note that I do not own（hat）thout the Super al clone not taiking about the super ol cione to be releaked later thit year according to＂Etrong rumors＂． versians MINERUA and SHS－2l is the versions HINERVA and SHS－2），is the most poweriful of commercially available OSE，and can now be ＂tranmplanted＂to NiGh and ATARt abchines．opening to concerned computeri（pius oxisting THOR，ONE pretty wat collection of high qual pretty vast collection of high quality cheaper software．

Yourf ancerely，Farraz menato．
We also haye no games combteent－
least to ganes reviens－there are glosiy ange to cover that side．
I＇墅 eorry to ane that you almo mont find wuch on the QL front in FORHMT not bacause won＇t like the machine （tt is atill the mont proframable of the 68000 mathine 部管 built）but becaute we have more than enough to to to covar the Spectruil of San ranges． Ed．

Dear Bditor，
I meurreatly working on almpler eer gusde for PCG＇s bask Top Publisher，wordnaster，Readiner and rypeliner．I am hoping to produce it －Dooklet for distribution to anyone interested．I conld pobsibly do this through your magatint ${ }^{(10)}$ eature，let 觔 fow if you are Intarested and I＇ll nite what 1 can do．
I anclose a copy of a programe procuced for a recent shom．Thise was done vary cuicily， 3 days．and does not represent the full Tuality palisble；however it doef how the baginner what can ba dott very quickly fith the muite of programa，I wat trate that the ontire progran vas one as complete pages and printed out，no paste－aps were used．

Yours sincerely，Adal Murdoch．
Although PCG＇（or what var．theis nase is this week）DTP is far froo being trua Dast Top Publituing it has attracted quite a following despite some of the worst mamuls roing． Therafore niny halp to untert will，I＇山ire，bo much appreciated．
A0 $\mathbf{t 0 5}$ four sample programan＊not bad at ali－ofrry I can＇t Ehow the readers．Bd．

## Dear Editor，

Concerning the takeover of Sinclair 4 Ban Computing，ina！a meaber of the group when if was known as the \＆J Treers＇Gromp．I found it very good and heipiul particularly as it apecialized solely for the＋3．There was a good PD library and I often sent of $f$ for variout utilitise the eervice was extremely efficient and ther was so alin of the problans which started towarde the and of 1990，which I surpect if when the Sts Computing was
firet planned
Hy nembership should iave elapnod 1 a February bat it was informed that it would be extended in vien of efeview which I cubaitted belag published． However，I gave up all hope of that many monthe ago．
I hope that you will now be able to publish ore +3 specific articles and can rovivi the PD library inciuding the Infobare Inder of all the utilitios included in the library． During iti last fow montha Sis Computing publiohed Parts 1 \＆ 2 of DPP guide which I found quite useful as it incladed several tipg to timprope Wordmaster．
I＇的 sure that there must be other 43 urer who mat program auch Es Wordaaster，Tasmosd is，Manterfile +3 otc and would like to utsilse these to their full extent and now you ley be able to telke this possible prouided of course，that aufticient interest is hown by all of un．
if you think that 1 may be able to telp in any way then please lat me now．For the record ey set－up is the 3 with Universal $3 h^{*}$ drive，Multizace and the Star LC2d－200 printer．Hir ortwars includes Wordeaste facludiag Feacliner and Typeliner） asword，Fasprint，Tas－ 1 ga ，Tascalc hatiorisie 33 and the Artít If， have custonlsed Tasword by replacing sllow me to utilise the traphic ynbols of the IBM 2 character get

Yours ilaceraly，H．D．Athias．
Yee will covar the 43，if people Frite thinge why to print then． 80 11 there is a contribution you would like to make I will be mogt grateful．
A to the PD library I would rather eave that up to others－we have sore than mough on cur plake the coant．PA libraries need to be run by dedicated people who are prepared to rork long hours for 11 ttle or po return－fanny．．．Jenny rackons or mp hat in the Format office anmey Ed．

Daar Editor，
Being a rubacriber to sajc I as very pleased with the service yon have
shom so far on the introduction to FORHAT．
at present I an unemployed but would 11ke to support Spectru and SAM．I
 mubacription to FORMAT and ES towarde the SAM retecue package）．

Youre sincersly，John Hoore．
I＇ve been there Jotu．I know now much f3 Elans．hil we car nay fil TEAKAS．Ed．

Desr seditor，
Re－Leslie Pollard＇s letter in the Novenber issue．There will be many of the who transferrod our loyaltide fro Danibl Garner bfter connercial considerations pertuaded Garner Denignt to broak faith with the +3 ．
However there nay bo 11ttle future
in chasing up the reanalning issuef of the DTP Dooklots．Judged by the usefalness of 18 suies one and two we would probably benafit gore by mending our own experiences with DtP to your latters page．
Hy gm experience wat one of frustration whenever 1 had to maarch for tert files which i had saved． Inveriably 1 had forgotten the मame that I had iflod then under．
1 reaedied thil by altering lime 30 of the Wordasster loader（pronzan ＊W（W）to read：－

30 SAVE a5＊＂．WH＂CODE E．I：RANDOMIZE USR z

MOTE：－I don＇t know why PGG und the variable＂ 1 ＂it cun be most confusing so make gure 14 agrees with the variable in line 10.
Having started to alter prograin＊hr decided to customize it to surt the +3 （with a＊B＂Drive and 1200 printer．Hy version is listed below．
Lines 50／55 alter the＂k＂ instruction so that I have the opportunity to CAT either drive＂A＂or opportunity＂B＂．
Line 105 enablas the Printer interface to $\log$ on to the citizen and Switt Pinters．
Linei 110 and 120 provide some divereion whilas the procram is loading and：－GOTO 9999 will load khis
prograt at＂nM＂
The idea in using＂hy＂ 18 so that you can ery Lohb＂AM＂which will use this progran to load wordmaster rithout interfering with the original pordnaster progras，If you like what you get you can energa the prograt again end change an beck to wi．
There are ton epaces betwean the quotes in 1 fne 10.
